SEATTLE

Making Content Accessible

What is Accessibility?

- Ensuring *all* students including and especially students with disabilities – can access and navigate your course content
 - Including screen readers, braille devices, and other assistive technologies
 - Visual enhancements
 - Keyboard-only or voice-controlled navigation

Types of Disabilities That May Impact Online Learning

- Visual
 - Blindness, low vision, color-blindness, contrast sensitivity
- Auditory
 - Deafness, hard-of-hearing
- Motor
 - Inability to use a mouse, slow response time, limited fine motor control
- Cognitive
 - Learning disabilities, distractibility, inability to remember or focus on large amounts of information
- Seizure or Vestibular Disorders
 - Seizures, nausea, dizziness from strobing, flickering, flashing or animated/moving objects of visual effects

Why is Accessibility Important?

- We cannot and should not exclude users with disabilities
 - Part of our mission, commitment to diversity and inclusion
 - Not good for business, not serving our students as well
- Accessibility benefits *all* users, not just people with disabilities
- Legally required in certain circumstances

SEATTLE

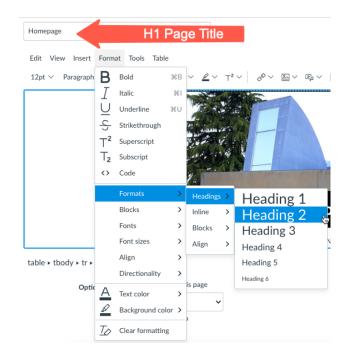

Some General Accessibility Principles & How to Incorporate Them in Canvas

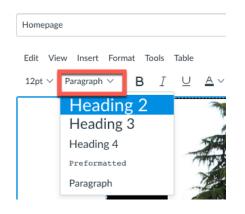

Proper Use of Headings

- Organize your content into a structure or outline using headings that convey a meaningful hierarchy
 - Text should be divided into parts labeled by headings
 - All text that *looks* like a heading should be marked up as a heading
 - Only one H1 heading per page
 - Don't skip levels (don't use an H3 if you haven't used an H2)

Marking Up Headings in Canvas

Lists

• Use bulleted (unordered) list or numbered (ordered) list to mark up list items

Edit View Insert Format Tools Ta	ble		_			
12pt \vee Paragraph \vee B I	$\bigcup \underline{A} \lor \underline{\mathscr{P}} \lor T^2 \lor \Big \mathscr{O} \lor \overleftarrow{\mathbb{A}}$		∣≣∖	₽∼⊒	≌ ~	:
				:=	°°°°	≣
This the table caption				12	A	<u> </u> =
Column Heading	Column Heading	Column Heading	Column	з —	c —	

Alt Descriptions for Images

- All images/graphics must have a short 'alt' description
 - Conveys the meaning/function of images to users who cannot see it (or see it well)
 - Read aloud by screen readers
- If images are not conveying important content, they can be marked as purely decorative

Accessible Alternatives for Text-Heavy Images

- Try to avoid images with lots of text in them
- If you decide to use a text-heavy image, provide an accessible alternative
 - If it's short, put the text in the 'alt' description (or add a lengthier caption)
 - Put the text straight on the page instead of within an image
 - Post an accessible file/PDF version

Adding Alt Text in Canvas

 When adding an image, either add Alt Text or mark box for

'Decorative Image'

	Image Options ×							
Alt Text ②								
Close up photo of leaf veins

Display Optior	าร							
O Embed Ima	age							
O Display Tex	xt Link (O	pens in a	new tal					
O Display Text Link (Opens in a new tab) Size								
Custom								
Custom			\sim					

Links

- Link text should be concise description of where users will go when they click link and make sense out of context

 Don't use "click here" or "read more" as link text
- Make sure they're working correctly
 - Fix broken links!
- Links should be the only thing on the page that are underlined
- As link text is read aloud by screen readers, don't use a URL as link text unless it's human-readable

Close

Inserting Links in Canvas

 Highlight text, then select Link icon or Insert > Link

Edit View Insert Format Tools Table $12pt \lor Paragraph \lor B I \cup A \lor \angle \lor T^2$ ITS Service Desk	✓ Ø ✓ □ ✓ □ ✓ ■ ✓ ■ ✓ External Links Course Links	ITS Service		lmage Media Document Equation Table Embed	> > >	Course Links	
In pop up, pa	aste in URL		_	Horizontal	line	Insert Link × Text ITS Service Desk Link Link https://www.seattleu.edu/its/support/service-desk/	

Tables

Tables should present tabular data

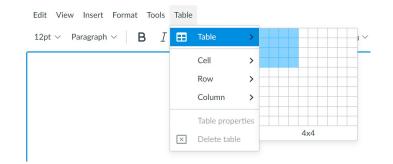

Avoid using tables to control page layout

- Add column and row headings to help users derive meaning from table data
- Add table caption

Inserting Tables in Canvas

 Select Table > Table in menu, select number of rows/columns you need

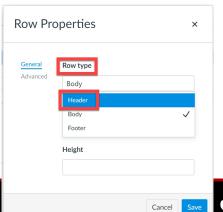

Adding Headings to Table

- To mark up headers, highlight cells then select Table > then cell or row properties
- Under "Type" select "Header"

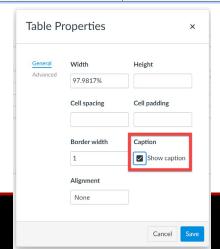

Adding Caption to Table

- Click to highlight table, then click Table > Table properties
- Check box to Show caption

	Edit View Insert Format Tools	Tab	le

	Data	×	Delete table	e 🗌
L	Data		Data	

Captions/Transcript for Multimedia Content

- Provide captions for video content
 - Canvas Studio, Zoom Cloud Recordings, YouTube can autogenerate captions
 - Autogenerated captions must be reviewed and corrected to meet legal guidelines
- Provide transcript for audio content

Canvas Studio

• Request captions in language being spoken in

Color and Contrast

- Don't rely on color alone to convey meaning, direct navigation, or differentiate between items
- Contrast ratio between the text color and the background color
 - WCAG AA: 4.5:1 for normal text, 3:1 for large text
- Contrast ratio for graphics is 3:1

Resources on Color Contrast

- <u>Colour Contrast Analyzer by Paciello Group</u>
- WebAIM Color Contrast Checker

– Need HEX codes

MarCom Brand Colors

 Includes HEX codes and recommended color combinations for high contrast between background/text color

Accessible Files

- Word
 - Make your Word documents accessible to people with disabilities
- PPT
 - Make your PowerPoint presentations accessible to people with disabilities
- PDFs

<u>Create and verify PDF accessibility (Acrobat Pro)</u>

CHAPTER 5 FINISHING AND SHARING THE STORY

Low-budget documentary shorts don't need a lot of complicated editing. Full-length documentaries often emulate the three-act story structure of fiction films. But all that is needed for a short digital documentary is a clear vision of what the story of your film is really about. Always try to narrow down to the material that bears on the story at hand. For a workable structure, arrange your footage so that there is a definite beginning, middle, and end—but there is tremendous leeway within these concepts. The documentary value of your piece depends more on organizing and narrowing down your options than on complex narrative structures. This chapter discusses the steps in transforming raw footage into a watchable video that others will enjoy and talk about.

- Set to appropriate language

Missing Alt-text

In addition to interviews, be sure to capture footage of subjects performing, interacting, or working to add visual interest. (Community Folklife Documentary Institute, North Carolina Arts Council)

Close-ups of objects or notes can also help narrate your story. From *Objectified* by Gary Hustwit.

- Right-click Figures alternate text and select Fix
- Create alternative text for images and figures unless they are purely decorative

Heading Structure

• Keep heading levels logical; no skipping levels

Table Irregularity

- Avoid merged cells
- Identify table headers and rows

Tags and Content Order

- Proper use of tags enhances screen reader usability
- Autotag may not always be correct
- After tagging ensure content order is correct
